### COURSE OVERVIEW

- Go to: [www.therapiststrainingtherapists.com](http://www.therapiststrainingtherapists.com) to view a "10 minute on demand course overview."
- OT and PT clinicians want reliable and valid tools to guide clinical decisions and identify impairments.
- This course will teach clinicians how to identify the right tool and define specific impairments in Balance, Gait, ADL, IADL, Sensory and Motor skills.
- Learn how to select assessment tools to measure risk factors for falls, emergency response and ability to live independently.
- Hands on course - Explore assessment tools, practice documenting & apply to case studies
- 6 PDU's for NBCOT Renewal
- Certificates of training will be provided at end of course

### YOUR COURSE INSTRUCTOR

Presented by Cathleen Johnson, MS., OTRL, a Division Rehabilitation Director for a large health care organization in which she provides both operational and clinical oversight for multiple post acute rehabilitation departments. Cathleen has over 25 years of health care experience understanding the role of the clinician, the department head and operator. She was appointed an additional role of Clinical Rehabilitation Consultant that allows her to provide guidance on documentation practices, clinical training and continuous quality improvement initiatives. She is a dynamic speaker that has trained thousands of clinicians nationwide.

### Learn how to assess

- Balance
- Gait
- Cognition
- ADL & IADL function
